Re: Release Memo for SOLABS QM 10.9.1-3 (Corrective Release)

Following the qualification of SOLABS QM10 release 10.9.1:

An issue was found with the Password Manager Portal causing an error that prevents the Portal Guard frame from closing due to cross-browser origins when a user accesses the portal from the SOLABS QM10 Login page. This issue has been fixed under QMX-1637/QMX-1730.

In addition, at the same time, SOLABS is upgrading its Password Manager service version (REF: QMX-1735). Both changes are interrelated.

The corrective release 10.9.1-3 has then been issued for the qualification of the fix which has been tested together with the upgrade of the Password Manager service using the following test:

- Test SOLABS_QMX_1637_QMX_1730

Testing Results:

- o Test SOLABS_QMX_1637_QMX_1730 was executed **successfully**.

There was no deviation generated during the testing of the corrective release 10.9.1-3.

The test has been executed with a successful result which confirms that the issue and the upgrade have been successfully corrected and implemented.

This memo confirms that SOLABS **QM 10.9.1-3** corrective release is qualified for use in a production instance and can be installed wherever the SOLABS QM 10.9.1 (or 10.9.1-1 and 10.9.1-2) is installed.
