Know Issues List: eRoom See in: **SOLABS QM10 READY FOR RELEASE** folder in Public Folder

---

Proof of Concept: Items currently being evaluated for their feasibility, design and technological requirements, business requirements, financial benefits, etc. In other words, can the idea be turned into reality?

Upstream: Items that have been proven to be of added values and that are currently being defined (requirements gathering, wireframe creation, analysis, impact assessment).

Development: Items currently being worked on (development, code review, development testing, PQM testing, packaging, etc.).

Qualification: Items that have gone through the whole upstream and development process and that are ready to be qualified as part of a new SOLABS QM10 release.
