### Packaging and Delivery

SOLABS Automated Services Center (SASC)

SQMT-0003: Full Automation of QM APPs Deployment

Items Ready for Release

See in: SOLABS QM10 READY FOR RELEASE folder in Public Folder

**Proof of Concept:** Items currently being evaluated for their feasibility, design and technological requirements, business requirements, financial benefits, etc. In other words, can the idea be turned into reality?

**Upstream:** Items that have been proven to be of added values and that are currently being defined (requirements gathering, wireframe creation, analysis, impact assessment).

**Development:** Items currently being worked on (development, code review, development testing, PQM testing, packaging, etc.)

**Qualification:** Items that have gone through the whole upstream and development process and that are ready to be qualified as part of a new SOLABS QM10 release.
