From: Martine Boire, Head of Product and Quality Management

Date: February 21, 2025

Re: Release Memo for SOLABS QM 10.10.0-3 (Corrective Release)

Following the qualification of SOLABS QM10 release 10.10.0:

An issue was identified with the calendars throughout the application.

When selecting a date between March 10 and November 2, 2025, the chosen date shifts by one day.

After selection, the calendar displays a date that is one day earlier than intended, with the UTC time shown as UTC-05:00 instead of the expected UTC-04:00 for that period. To accurately select a specific date within this range, users must choose a date one day later than desired.

To address this issue, **corrective release 10.10.0-3** was issued and successfully qualified using the following test:

- **Test SOLABS_QMX_1950**

Testing Results:

- **Test SOLABS_QMX_1950** was executed successfully.
- No deviations were encountered during testing of corrective release **10.10.0-3**.

The successful execution of this test confirms that the issue has been resolved.

This memo confirms that **SOLABS QM 10.10.0-3** is qualified for deployment in a production environment and can be installed wherever **SOLABS QM 10.10.0** (or 10.10.0-1 and 10.10.0-2) is in use.
