

RELEASE NOTES FOR SOLABS QM 10.11.0 (2-Jul-2026 update)

Internal Tracking (Ticket No.)	Area(s) Impacted	WHAT is New?	WHY?
CATEGORY: <u>UI/UX</u>			
Multiple (Refer to the Note at the end of this table)	All sections	<p>The user interface refresh introduced in Release 10.11 is an important step in the ongoing evolution of the SOLABS QM10 platform. As customer needs, technology standards, and user expectations continue to evolve, it became essential to modernize the user experience to ensure the system remains intuitive, efficient, and scalable. The updated interface is designed to improve usability, streamline navigation, and create a more consistent experience across the application.</p> <p>In addition to enhancing the overall user experience, the new UI provides a stronger foundation for future innovation. The modernized framework enables SOLABS to introduce new features more efficiently, maintain consistency across modules, and support continued growth of the platform while meeting current industry expectations for software usability and accessibility.</p> <p>Ultimately, the UI revamp reflects SOLABS' commitment to delivering a modern, user-centered quality management solution that helps customers work more effectively and confidently.</p>	
Multiple (Refer to the Note at the end of this table)	Search Function	<p>Complete review of Search Function</p> <p>Allow for wider adoption of the Search Function by providing filtering and ordering options, facilitating usage of supported search syntax, automatically saving search queries, allowing for tagging favorite queries and including a <i>back to search results</i> option when leaving the search page, and narrowing fields "searched into" by default.</p>	
QMX-1545	Document	Document Status displayed in the document treeview and in the table views have a specific color per status.	User experience enhancement.
QMX-1701	Top Panel	A list of the 10 recently accessed folders is always available on the Top Panel.	Respond to client requests to facilitate direct and quick access to the document treeview.

RELEASE NOTES FOR SOLABS QM 10.11.0 (2-Jul-2026 update)

Internal Tracking (Ticket No.)	Area(s) Impacted	WHAT is New?	WHY?
QMX-1707	Copy Link function	The Get Link menu is replaced by a Copy Link menu that automatically copies the link to your clipboard.	Save time, enhance user experience.
QMX-1721	QM APPs	A new process navigator is available in the process view page to navigate from one process to another (next, previous, first, last, next tenth, previous tenth).	Facilitate review and access to multiple quality processes during a single session.
QMX-1737	Top Panel	A link is displayed to the Root instance for end-users who have access to it. The Root instance is SOLABS' internal instance, which is used by system owners, administrators to approve documents, support periodic audits, etc.	Facilitates retrieval of the URL.
QMX-1738	Table Views	The possibility of going from one page to the other on the table views or expand/collapse the table is available at the top and the bottom of the tables.	Direct response to client requests.
QMX-1740	Views	Views have their specific URL, and Open Link in a new Tab feature is implemented for top menus, views, treeview.	Improved support to use multiple tabs within a single browser window.
QMX-1879	All Pages	An option to go back to the top of the page is available, the Copyright and Release information are displayed, and the client logo is displayed at the bottom of every system page.	Improve navigation.
